

## Mr. Neil Burns

### Instructor:

Neil Burns is a founder and co-director of Croft Filters Limited and Croft Additive Manufacturing Limited, Warrington, United Kingdom and has more than 30 years' experience developing and delivering high quality filtration solutions to a range of industries in the UK and worldwide. His engineering experience began with wire mesh fabrication and along with brother Mark Burns they formed Croft Engineering Services, originally mesh suppliers. Their engineering abilities took them along the natural progression path to filter manufacturing. Croft Filters company has grown to thirty employees.

He aims to introduce advances in processes employed in filter manufacture as well as creating improved filtration solutions of high quality. Improvements in filter outputs allow him to continually advance their environmental policy to reduce not only their own carbon footprint but that of their customers.
